This is the top layer, highest level of abstraction.

Tik Tok's User Data (1)

One layer deeper:

Tik Tok's CEO explained that user data is stored in two places currently.

```
┌─────────────────────────────────┐ (1)
│      Virginia data center       │
└─────────────────────────────────┘
                 ↕
┌─────────────────────────────────┐ (2)
│     Hong Kong data center       │
└─────────────────────────────────┘
```
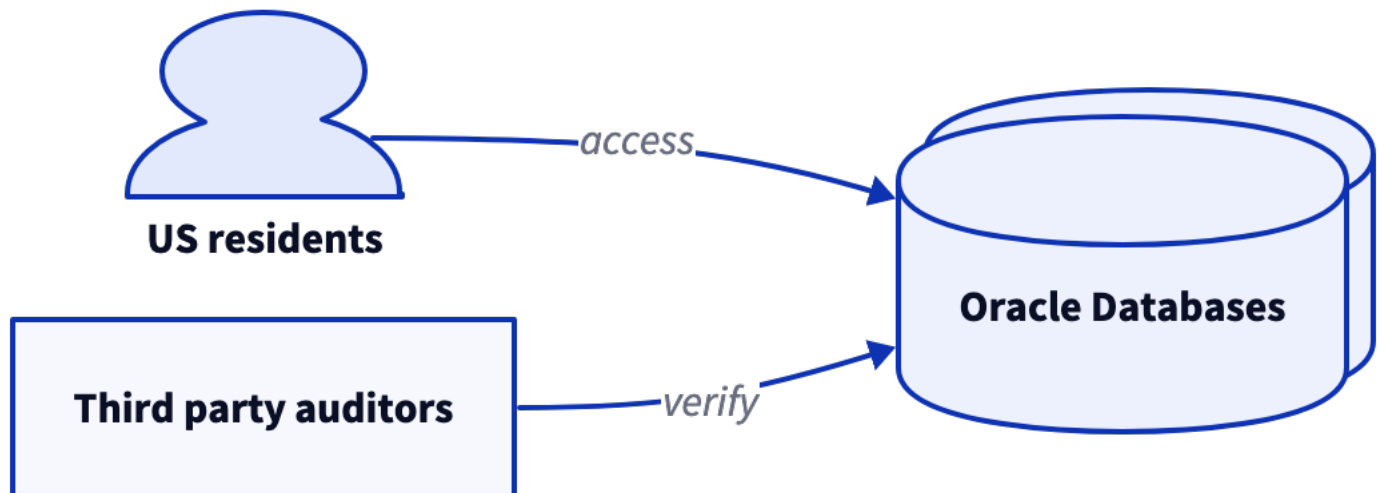

(1) root > tiktok > virginia

(2) root > tiktok > hongkong

Getting deeper into details:

TikTok's CEO explains that Virginia data center has strict security measures.

US residents

Third party auditors

Oracle Databases

access

verify

TikTok's CEO says data is actively being deleted and should be done by the end of the year.
